

LS2

HELMETS

COLLECTION 2024-2025

**ALWAYS
AHEAD**

HISTORY

The LS2 brand was born in 2007 with a clear purpose: to become the world market leader in the motorcycle helmet industry. More than 30 years of experience from its parent company, MHR, has contributed to its rapid growth.

LS2 covers all needs of two-wheel lovers from “head to toe”: helmets, jackets, pants, gloves, boots, and goggles.

Distributed in more than 125 countries and being the market leader in many of them, LS2 is undoubtedly the fastest-growing brand in its industry, demonstrating the love and trust of motorcycle consumers.

BRAND PILLARS

01 SAFETY

Protecting your dreams! Safety is our number one priority; we are committed to offer maximum protection to all our riders.

02 QUALITY

We only use high quality materials! Our products meet or exceed the most demanding test standards required internationally.

03 INNOVATION

LS2 constantly invest in R&D and we are continuously searching for modern technology to incorporate into all our products.

04 DESIGN

Style and design! We are highly creative in terms of graphics and product design without compromising on quality and safety.

05 PASSION FOR RACING

We love motorsport! LS2 is a proud sponsor of several riders in different categories (moto2, moto3, SuperBike, Dakar and many more).

MATERIALS

CARBON

(MICRO WEAVE CARBON)

Carbon Fibre is a material used extensively in the aeronautical industry and of course in the highly competitive world of Formula 1 and MotoGP. It has incredible strength but it's extremely light.

LS2 uses multiple layers of our exclusive wide-weave carbon fibre for a very light, but strong shell that offers state-of-the-art energy management for the utmost on safety.

6K CARBON FIBER

With a minimum 6000 carbon fiber weave, LS2 sets the pace for high performance Carbon Fiber motorcycle helmets beyond the capabilities of any other helmet manufacturer in the market.

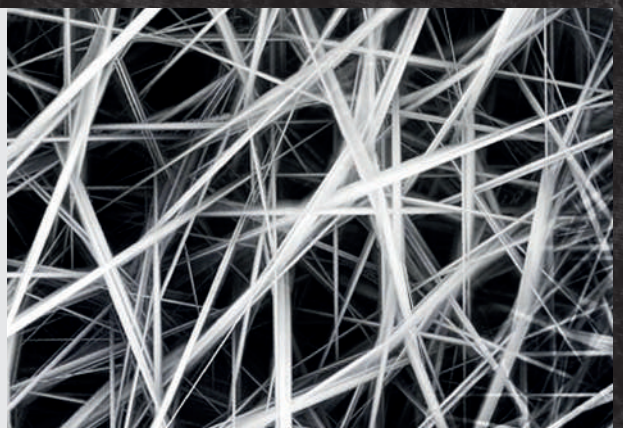

9K CARBON FIBER

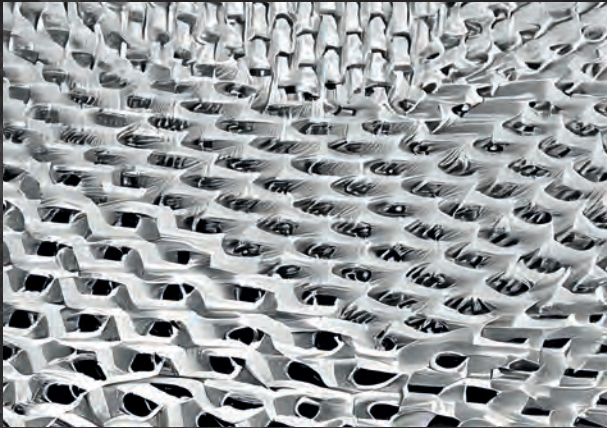

Champions need championship-level equipment. Our top racing helmets, the FIM approved THUNDER GP PRO & X-FORCE PRO are ultra-light with enhanced shock absorption attributed to the high-performance 9000 Carbon Fiber weave.

HPFC

(HIGH PERFORMANCE FIBREGLASS COMPOSITE)

High Performance Fibreglass Composite is a carefully layered, proprietary blend of a unique weave of fibres pre-filled with resin into a strong, ultra lightweight, but rigid shell that bears an impact while better dispersing and managing energy for a safer ride.

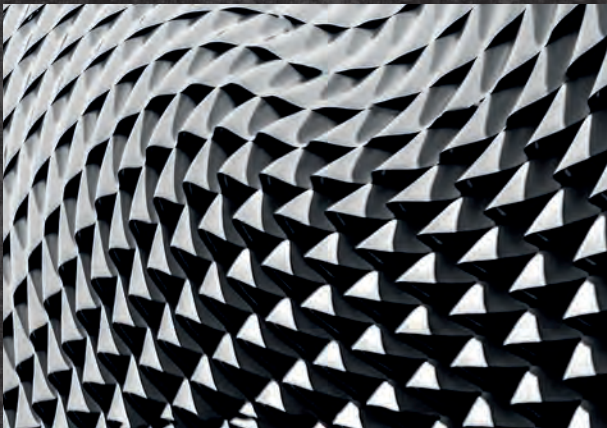

KPA

(KINETIC POLYMER ALLOY)

A proprietary material specifically formulated by LS2, KPA utilizes nanoparticle technology to blend space age thermoplastics along with microscopic levels of aramid fibres for a material that is strong, lightweight, and offers the latest in high performance energy management for a safer ride. This special formula meets both ECE 22.06 and DOT requirements.

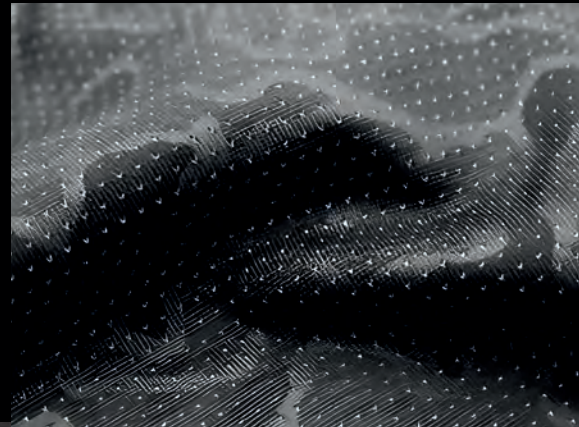

HPTT

(HIGH PRESSURE THERMOPLASTIC TECHNOLOGY)

LS2 developed HPTT as the perfect blend of ABS and other thermoplastic polymers to offer the ultimate balance between safety, energy managing performance, weight, and value.

X-STATIC® fabric is bonded with 99.9% pure silver to the surface of Nylon 6.6, meaning that no nanotechnology chemicals are used to create permanent antibacterial, odor control, thermal regulation, and anti-static electricity functions. These functions will not fade after many washes and will last for the product's entire lifespan. X-STATIC® has been proven to effectively inhibit bacteria and mold, thus helping to reduce unpleasant odors.

Coolmax® fabric helps evaporate moisture and promotes breathability. It is made of a special fiber, composed of four to six channels that create a transport system capable of moving moisture from the skin to the outer layer of the fabric. This system dries moisture faster and more effectively, while simultaneously regulating body temperature through evaporative cooling.

OUR RIDERS

FERMIN ALDEGUER MOTO 2
